

Touched by Grace

Read Me

Here are the instructions to use the "Touched by Grace" presets for Arturia MatrixBrute and Expressive E Touché.

1 CONTENT OF THE ARCHIVE:

- Readme [.txt]: current text file.
- Touche Presets [Folder]:
 - 16 Touché presets [.tem]: to use with Touché's companion software, "Lié".
- Touched-by-Grace_Expressive-E [.mbprojz]: MatrixBrute project to import in the Arturia MIDI Control Center

2 HOW TO USE

The first step described below will allow you to load the MatrixBrute presets. The second step allows to load the related presets for the Touché controller, it is only required if you plan to use these presets with the Touché.

2.1 Importing the Touched by Grace sounds in your MatrixBrute:

- Download the Arturia MIDI Control Center from this page: <https://www.arturia.com/products/matrixbrute/resources>
- Launch the file and follow the different steps to get it installed on your computer
- Launch the MIDI Control Center
- In the product list (top-left corner) select the MatrixBrute
- Connect your MatrixBrute to your computer
- In the left part of the Matrix View, click on the "Import" button then "Import New Project"
- Select the file Touched-by-Grace_Expressive-E.mbprojz. This will create a new project (vertical list on the left)

- Select the new project Touched-by-Grace_Expressive-E. This will display the related presets in the matrix aside the list. The first row (bank A) includes the presets that are meant to be used with both the MatrixBrute and Touché while the second row (bank B) includes adapted versions to be used with the MatrixBrute alone.
- You can transfer those presets in the MatrixBrute memory by simple drag-and-drops of an individual preset, a row (bank) or the whole project.
/!\ Pay attention not to overwrite contents that you would like to keep /!\

2.2 Load the presets in the Touché controller:

- Download the software "Lié" from the Expressive E website: <https://www.expressivee.com/>
- Launch the file and follow the different steps to get it installed on your computer
- Launch Lié
- In the menu, select "Settings" then "Open Preset Folder"
- Copy paste or drag-and-drop the Touché's presets [.tem] from the folder "Touche Presets" in the archive.
- These presets will appear in the preset browser of Lié (on the left).
- Connect the Touché to your computer
- In the Lié menu, open "Memory View"
- Click on a free memory slot to select it
- Double-click on the preset that you want to load in the browser
- Click on "Save in Memory"
- To take advantage of these presets connect the Touché and MatrixBrute with a MIDI DIN cable and the MIDI-to-Jack adaptor for Touché.
- Use the Touché encoder to select the appropriate memory slot.
